Here is the latest info we had on the bradenhead testing- I forwarded this to Greg when I got it in Feb. You can see that neither EPA nor the Tribes were copied on Gary Strong's email, though we are both members of the wellbore integrity work group.

Ayn,

Please see the attached plan for further testing of wells that showed bradenhead pressure after bleed-off. I noticed that EPA Well Integrity members had not been copied on the email, so will forward to you for distribution.

If I'm not mistaken, some of the work may be underway.

All,

Attached is a plan to further test the wells which found bradenhead pressure. There are some wells to be added to the testing due to their proximity to the monitor wells.

Please review and provide any suggestions for send off to Encana.

Thank you.

Gary Strong
